

Vetrov Anatoly Nikolaevich, author of the unique cognitive modeling technology
www.vetrovan.(spb.)ru

The RF, Saint-Petersburg city

THE FUNDAMENTAL RESEARCHES FINANCING BRANCH
“COGNITIVE MODELING IN THE MATHEMATICAL SCIENCES” (“OMN”)
OF “THE SF "SFA CMT" NAMED AFTER N.A. PROKOPENKO”

The developed “The fundamental researches financing branch
"Cognitive modeling in the mathematical sciences"” (“OMN”)
treats to the fundamental researches financing divisions
of “The scientific fund "System and financial analysis
based on cognitive modeling technology" named after N.A. Prokopenko”
 (“The SF "SFA CMT" named after N.A. Prokopenko” – The SF) as the first SF
in structure of “The SIO "Academy of cognitive natural sciences”” (“The SIO "ACNS””),
an additional component of science and education system of the modern country
for the financing of creation, distribution and use
of the fundamental main and derivative scientific results
of the cognitive modeling technology (CMT) (www.vetrovan.(spb.)ru)
[see the fundamental researches financing branches and departments of The SF]:
1) it is executed by the principle of “administrative-economy submission”;
2) works in several main directions, which allow to provide
the financing of development, production and promotion
of the fundamental main and derivative scientific results
(my second report on SRW from 2006-2008(9) y. was submitted
to “The SPbSETU "LETI”” and The Government of The RF
for the translation, carrying out of int. action and receiving of “The Nobel Prize”);
3) includes several various main divisions:
I. “The fundamental researches financing department
"The theory of the mathematics and complex system analysis
based on cognitive modeling technology"” (“SM”) (*)
[the financing of fundamental researches and developments in area
“ T h e o r e t i c a l m a t h e m a t i c s ” (*) –
theory of mathematical logic and theoretical bases of mathematics,
theory of numbers, theory of algebra, theory of topology, theory of geometry,
theory of the mathematical analysis, theory of functions of valid variables,
theory of functions of complex variables,
theory of ordinary differential equations,
theory of differential equations with private derivatives,
theory of integrated equations,
theoretical mathematical models
of objects, processes and phenomena of natural and technical sciences,
theory of equations of mathematical physics, theory of variation calculus,
mathematical theory of optimum control, theory of the functional analysis,
theory of calculation mathematics, theory of probability and mathematical statistics,
theory of the combinatory analysis, theory of graphs, theory of mathematical cybernetics,
theory of ways of representation of structure of cognitive models and problem environments,
theoretical basis of parametrical cognitive models block,
theory of cognitive modeling technology
in theoretical mathematics ;

the financing of fundamental researches and developments in area “The theoretical complex system analysis” ()* – theory of general questions of the complex system analysis, theory of tendencies, dependences and laws of the complex system analysis of objects, processes and phenomena, theory of cognitive modeling technology with dynamic cloning, verification and subverification, theory of iterative cycle and technique of use of cognitive modeling technology for the complex system analysis of difficult objects, processes and phenomena, theory of parametrical cognitive models block for the complex system analysis and increase of efficiency of functioning of difficult objects, processes and phenomena, theory of structure of cognitive model of the 0th, 1st, 2nd and 3rd generation, theory of ways of representation of structure of cognitive models and problem environments: formal classical of the 0th generation (logical and production models), nonformal classical of the 0th generation (semantic network, frame network and ontology), formal new of the 0th generation (calculus of theory of sets and corteges on domains and innovative calculus of theory of sets and graphs), nonformal new of the 0th generation (multilevel structural scheme and multilevel encapsulated pyramids combining theory of graphs and theory of sets), flat of the 1st generation (cognitive circle and cognitive disc), volumetric of the 1st generation (cognitive cylinder, cognitive cone and cognitive sphere), flat and volumetric of the 2nd generation (one-, two-, three-, four-, five- and more cognitive circle, cognitive disc, cognitive cylinder, cognitive cone and cognitive sphere), hybrid of the 3rd generation (combinations of the existing cognitive models), theory of algorithms of formation of difficult cognitive models the 0th, 1st, 2nd and 3rd generations, theory of techniques of parameters research of difficult cognitive models of the 0th, 1st, 2nd and 3rd generations, theory of algorithms of a posteriori data processing of the complex system analysis, theory of software for automation of research tasks, theory of statistical substantiation of practical use of received results, theory of factors influencing to efficiency of functioning of difficult objects, processes and phenomena, theory of organization and plan of carrying out of experiment, theory of research of cognitive models parameters, theory of preliminary processing of a posteriori results of diagnostics, theory of choice of statistical analysis methods of generated data sets, theory of analysis of productivity dynamics of training, theory of dispersion, regression, discriminant, cluster analysis, multidimensional scale, factor analysis and bibliographical lists, the theoretical complex system analysis of basic rocket engine, the first, the second, the third and the fourth rocket engine of launch vehicle, the theoretical complex system analysis multivariate code device, the theoretical complex system analysis modified model of reduced eye for research of visual acuity, field of vision, color perception and others parameters in Descartes space of the 2 and 3 coordinates, the theoretical complex system analysis modified model of reduced ear for research of absolute sensitivity and thresholds of sensitivity in Descartes space of the 2 and 3 coordinates, the theoretical complex system analysis chemical element with 1, 2, 3, 4, 5 and more nucleus, the theoretical complex system analysis difficult multivariate hurricane and others].

II. "The fundamental researches financing department
 "The theory of the cybernetics and (Cognitive) computer science"" ("SPMI") (*)
 [*the financing of fundamental researches and developments in area*
"Theoretical cybernetics" –
 theory of automatic control systems,
 theory of modeling, theory of cybernetic control systems,
 theory of information, theory of artificial intelligence,
 theory of discrete (final) automatic devices and formal languages,
 theory of reliability, theory of the applied system analysis,
 theory of cognitive modeling technology
 in the theoretical cybernetics;
the financing of fundamental researches and developments in area
"Theoretical Computer science" –
 theory of Computer science, theory of organization of information work,
 theory of documentary information sources,
 theory of analytical-synthetic processing of documentary information sources,
 theory of information search, theory of information service,
 theory of technical means of information processes support,
 theory of cognitive modeling technology
 in the theoretical Computer science;
the financing of fundamental researches and developments in area
"Theoretical Cognitive computer science" (*) –
 theory of modified stratified-step model
 of perception (psycho-physiology of perception), processing (cognitive psychology)
 and understanding (cognitive linguistics) of information fragments content,
 theoretical bases of Cognitive computer science and cognitive modeling technology
 in technical, economical, physical-mathematical and other sciences,
 theoretical bases of parametrical cognitive models block
 for the system analysis of information-educational environments
 (cognitive models of subject of training and means of training),
 theoretical bases of parametrical cognitive models block
 for the financial analysis of (credit) organizations
 (cognitive models for the vertical, horizontal and trend
 financial analysis of (credit) organizations and enterprises),
 theoretical bases of parametrical cognitive models block
 for the complex system analysis
 of objects, processes and phenomena of Cognitive computer science,
 theory of ways of representation of structure of cognitive models and problem environments,
 theory of adaptive automation means of information-educational environment
 (basic and applied diagnostic module, electronic textbook,
 laboratory practical work, electronic dean, electronic library and others),
 theory of technical means of adaptive information interaction support
 (adaptive representation of sequence of information fragments processor,
 question-answers structures sequence processing processor,
 linguistic processor and other processors),
 theory of technical means of the financial analysis support
 (automation means of formation of working plan of accounts
 based on normative-regulated plan of accounts of the accounting,
 automation means of formation of accounting balance
 and report about profits and losses of organization,
 automation means of the vertical, horizontal and trend
 financial analysis based on analytical coefficients system),
 theory of technical means of the complex analysis support
 (automation means of formation and research of cognitive circle,
 cognitive disc, cognitive cylinder, cognitive cone, cognitive sphere,
 one-, two-, tree-, fore-, five- and more cognitive sphere and others)].

The fundamental researches financing branches and departments of The SF
 allow to the financing of development, production and promotion
 of the main and derivative scientific results of CMT.
